

RAILWAY TRACK TEAM LEADER

Rail Baltica is the largest Baltic transport infrastructure project that will create the North – East economic corridor. It will be an electrified, high speed railway line with modern infrastructure for passenger and freight services, ensuring environmentally friendly and fast transportation from Tallinn to the Lithuanian-Polish border. Rail Baltica will connect the Baltic States with Central and Western Europe. The project is largely co-financed by the European Union. It must be well-governed, with clear financial flows and procurement systems. RB Rail AS is looking for a new enthusiastic COLLEAGUE to JOIN our rapidly growing **TECHNICAL TEAM** in a position of **RAILWAY TRACK TEAM LEADER**.

Our ambition is to design, procure and delivery the new best-in-class, innovative, environmentally friendly railway infrastructure with cost competitive technical solution in the region to improve the long-term well-being of the society of the Baltic States and European community. We plan, develop and manage all technical aspects of entire Rail Baltica project to achieve cross-border interoperability. RB Rail AS is the three Baltic States' joint venture, it was established in October 2014 and is registered in Latvia. Main business of the joint venture is the design, construction and marketing of the railway. RB Rail acts as a main coordinator of the project.

JOB SUMMARY

The primary responsibilities of Railway Track Team Leader will be to serve as in a lead technical role including team management, planning, analysis, design, design review, work supervision and commissioning of the railway alignment, track superstructure and right-of-way throughout the global Rail Baltica project. Railway Track Team Leader will report to the Head of Civil Works and Stations Department.

QUALIFICATION

- Master's degree or equivalent in Civil Engineering;
- 5 + years' experience of railway track (1435 mm) alignment engineering, design, supervision and acceptance;
- Experience in high speed (> 250 km/h) line railway track alignment engineering;
- Proficient in AutoCAD Civil 3D or other similar design tools;
- Project management experience (budgeting, estimating / forecasting / costing and reporting, resources planning, allocation and management);
- Well-developed communication and leading skills, with ability to effectively interact with both the business partners and internal technical team members;
- Outstanding organizational abilities and technical mindset;
- Fluent English, including technical English;
- Resilient to coping with conflicting demands, able to prioritize duties and work under pressure;
- High ethical standards, honesty and impeccable reputation;
- Able to benchmark and apply best practices of large infrastructure projects;
- Strive for continuous improvement and precision in every detail;
- Highly developed communication skills and willingness to work in a team environment.

RESPONSIBILITIES

- Lead and supervise the design process of railway alignment, track layouts and superstructure. Examine consultants' deliverables, arrange additional Detailed Technical Design assessments and approve the design solutions of railway alignment and track;
- Develop requirements, review and check design solutions of railway track from maintainability and accessibility perspective;
- Liaison with Consultants and 3 party service providers;
- RB Rail technical input regarding railway alignment and superstructure design according to design requirements;
- Supervision, examining and approving the design solutions regarding railway alignment, track superstructure, track layouts, turnouts and structural clearances;
- Provide expert inputs to improve the Rail Baltica Design Guidelines and project requirements for railway alignment and track superstructure design;
- Close cooperation with the National Implementing Bodies;
- In accordance with the employer's request and within the scope of the work responsibilities, participation in the technical expert groups and preparation of technical specifications of procurement;
- In accordance with the employer's request and within the scope of the work responsibilities, to participate in the preparation of technical specifications and participate at the RB Rail AS public procurement committees requiring a status of state official and once a year filing of a state official's declaration.
- To ensure general supervision for Rail Baltica track superstructure during construction works
- To provide general consultations for RB Rail AS project managers during design and construction period;
- To act as a project manager (client representative) in own responsibility area (studies or other expert assignments);
- Lead, motivate and develop the Railway track and alignment team;
- Create an inspiring team environment with an open communication culture;
- Set clear team goals;
- Oversee day-to-day operation;
- Monitor and report on team's performance;
- Listen to team members' feedback and resolve any issues or conflicts.
