

BUILDING ENGINEER

Rail Baltica is the largest Baltic transport infrastructure project that will create the North – East economic corridor. It will be an electrified, high speed railway line with modern infrastructure for passenger and freight services, ensuring environmentally friendly and fast transportation from Tallinn to the Lithuanian-Polish border. Rail Baltica will connect the Baltic States with Central and Western Europe. The project is largely co-financed by the European Union. It must be well-governed, with clear financial flows and procurement systems. RB Rail AS is looking for a new enthusiastic **COLLEAGUE** to join our growing Technical team in a position of **BUILDING ENGINEER**.

Our ambition is to plan, monitor and control the delivery the new best-in-class, innovative, environmentally friendly railway infrastructure with cost competitive technical solution in the region to improve the long-term well-being of the society of the Baltic States and European community. We plan, develop and manage all technical aspects of entire Rail Baltica project to achieve cross-border interoperability. RB Rail AS is the three Baltic States' joint venture, it was established in October 2014 and is registered in Latvia. Main business of the joint venture is the design, construction and marketing of the railway. RB Rail acts as a main coordinator of the project.

SUMMARY

Building Engineer - will be responsible for reviewing of the developed project solutions at the Global project level. Will supervise design and construction works of Rail Baltica project, will review reports of designers and construction companies, ensuring that Rail Baltica design guidelines, local construction norms and procedures are aligned with design solutions. Building Engineer will do revisions of design solutions to ensure that the most appropriate and cost-effective technical solution is implemented for the Rail Baltica project.

REQUIREMENTS

- Higher education in construction of buildings and/or roads/railways specialties;
- Experience in project management, budget preparation, evaluation and forecasting, resource planning and management, as well as organization of cooperation with clients and cooperation partners;
