

## SENIOR RAILWAY OPERATION EXPERT

**Rail Baltica** is the largest Baltic transport infrastructure project that will create the North – East economic corridor. It will be an electrified, high speed railway line with modern infrastructure for passenger and freight services, ensuring environmentally friendly and fast transportation from Tallinn to the Lithuanian-Polish border. Rail Baltica will connect the Baltic States with Central and Western Europe. The project is largely co-financed by the European Union. It has to be well-governed, with clear financial flows and procurement systems.

Our ambition is to plan, monitor and control the delivery the new best-in-class, innovative, environmentally friendly railway infrastructure with cost competitive technical solution in the region to improve the long-term well-being of the society of the Baltic States and European community. RB Rail AS is the three Baltic States' joint venture, it was established in October 2014 and is registered in Latvia. Main business of the joint venture is the design, construction and marketing of the railway. RB Rail AS is looking for a new enthusiastic colleague to join our growing team in a position of **SENIOR RAILWAY OPERATION EXPERT**.

### JOB PURPOSE

We are looking for an outgoing and highly organized **Senior Railway Operation Expert** to lead a technical role for all aspects related to train operations and to manage the O&M activities inside the project. To be successful, he should have an analytical mind to be able to resolve problematic situations (at operational, technical, administrative levels) efficiently with a large-scale picture and have excellent communication and organizational skills. He shall also be able to handle railway maintenance issues.

### QUALIFICATION

- Bachelor's degree in electrical engineering or equivalent;
- 10+ years' experience of 1435 mm railway systems engineering, design, supervision and acceptance, in infrastructure manager, engineering or construction company;
- Experience in high speed (> 200 km/h) line railway engineering (desirable);
- Knowledge of FIDIC conditions of contract for construction;
- Knowledge of RAMS concepts;
- Knowledge in AutoCAD suite or other similar design tools (desirable);
- Project management experience (budgeting, estimating / forecasting / costing and reporting, resources planning, allocation and management);
- Well-developed communication skills, with ability to effectively interact with both the business partners and internal technical team members, ability to express and to present technical concepts to stakeholders (technical and non-technical);
- Outstanding organizational abilities and technical mindset;
- End customer (future passengers and cargo owner) oriented;
- Fluent in English and possibly of one of Baltic languages, and a good command of technical English;
- Resilient to coping with conflicting demands, able to prioritize duties and work under pressure;
- High ethical standards, honesty and impeccable reputation;
- Able to benchmark and apply best practices of large infrastructure projects;
- Strive for continuous improvement and delivery orientation;
- Highly developed communication skills and willingness to work in a team environment.

### RESPONSIBILITIES

The Railway Track Material Expert will report to the Railway Track Team Leader under Civil Works and Stations Department.
