Vacancy
BRIDGE AND STRUCTURES BIM ENGINEER

Rail Baltica is the largest Baltic transport infrastructure project that will create the North – East economic corridor and it will be an electrified, high-speed railway line with modern infrastructure for passenger and freight services, ensuring environmentally friendly and fast transportation from Tallinn to the Lithuanian-Polish border. Rail Baltica will connect the Baltic States with Central and Western Europe. The project is largely co-financed by the European Union. It must be well-governed, with clear financial flows and procurement systems. RB Rail AS is looking for a new enthusiastic COLLEAGUE to join our growing team in a position of BRIDGE AND STRUCTURES BIM ENGINEER.

JOB PURPOSE:
The primary responsibilities of Bridge and Structures BIM Engineer will be to serve in a technical role including planning, analysis, review of bridges and other structures deliveries through whole project using the latest BIM tools.

QUALIFICATION
- Bachelor’s degree or equivalent in Civil Engineering, with strong Structural or Bridge Engineering background
- 3+ years experience of Structural or Bridge engineering, design and design supervision
- Experience of working with BIM tools, data validation and coordination is required
- Experience with infrastructure (particularly – railway) design and/ or BIM projects is desired
- Proficient in the MS Office Suite and common CAD tools
- Solid verbal, written and presentation skills
- Well-developed communication skills, with ability to effectively interact with both the business partners and internal technical team members
- Outstanding organizational abilities and technical mindset
- Resilient to coping with conflicting demands, able to prioritize duties and work under pressure
- Fluent in English and good command of technical English
- High ethical standards, honesty, and impeccable reputation
- Able to benchmark and apply best practices of large infrastructure projects
- Strove for continuous improvement and perfectionism in every detail
- Must have strong communication skills and a willingness to work in a team environment

RESPONSIBILITIES
- Complete structures discipline design deliverables review in BIM environment for all structural aspects of bridge projects and related infrastructure and similar railway structures (bridges and other structures)
- To validate information between BIM models and 2D drawings/ project documentation
- To learn and explore the latest solutions and find new best practices of digital engineering
- To use and improve the BIM usage practices from Bridge discipline point-of-view and to transfer the knowledge to other team members
- To improve the internal digital design review processes
- To cooperate when needed with BIM team members and consultants in each country
- In accordance with the employer’s request and within the scope of the work responsibilities, to participate in the preparation of technical specifications and participate at the RB Rail AS public procurement committees
- Cooperate with national Implementing Bodies and other stakeholders, if required/ requested
- Contribute the Asset management solution implementation and maintenance
- During construction stage – follow and review bridge related asset information; monitor and validate the information submitted by the Contractor
