Roads Expert is the largest Baltic transport infrastructure project that will connect the North – Baltic States, Russia, Poland and similar railway systems, creating environmentally friendly and fast transportation from the Lithuanian-Estonian border to Tallinn. Rail Baltica will connect the Baltic States with Central and Eastern Europe. The project is largely co-financed by the European Union. It must be environmentally and well-governed, with clear financial flows and proper planning of all activities to avoid unnecessary enthusiasm. Collaborate to join your team in a position of ROADS EXPERT.

Our ambition is to plan, monitor and control the delivery the new Baltics—one of the most innovative, environmentally friendly railway infrastructure with cost competitive technical solutions in the region to improve the long-term well-being of the society in the Baltic States and European community. We plan, develop and manage all technical aspects of entire project, including contract management, risk management, procurement and design reviews. We are responsible for the project’s implementation. All Rail Baltica is a very Strategic partner venture, it was established in October 2014 and is registered in Latvia. Main business of the joint venture is the design, construction and marketing of the project. Rail Baltica is a main actor as a coordinator of the project.

The primary responsibilities of Road Expert will be to serve in technical role including planning, analysis, design and detailing of roads and related infrastructure project through whole project including construction phase, where he will be acting as Road designer and construction activities supervisor.
