

Vacancy

Technical Project Manager

RB RAIL AS Branch office in Tallinn, Estonia

Rail Baltica is a once-in-a-lifetime infrastructure megaproject – if you're looking for a meaningful work in an international setting, look no further. This is where you can make an impact to be proud of.

You will be part of integrating the Baltic States into the European rail network and building a new economic corridor to bring long-term benefits to the Baltic region and its people. You will work with a cross-border team of more than 200 of the brightest minds in the industry.

We are looking for a new enthusiastic colleague to join our growing team in the position of **Technical Project Manager, Estonia**.

Job summary

The Project Manager will be responsible for directing and supervising the Rail Baltica project for and on behalf of the joint venture. Including, relationship management with relevant stakeholders, managing the technical direction through planning, design, and implementation in accordance with the global project objectives and best practices of the project management particularly related to the scope of works, time of the project implementation, budget control, and the quality of the works. Regularly report the progress and status of the works to senior management and identify/manage issues/risks arising during the project works implementation. The Project Manager must exhibit strong leadership skills to indirectly manage resources and drive the project to successful completion in time, within dedicated budget and within required quality.

What's in it for you

A job with purpose and impact

Exceptional international project experience

Innovation-driven work

Professional and self-development

Flexible work arrangement

Benefits and Bonus programme

Supportive network of professionals

Competitive Salary

We will entrust you to

- Manage, plan, and oversee execution of the assigned Rail Baltica project parts in line with the established plans, budget and quality for the global project
