

Vacancy

Railway Track Expert

Any RB Rail AS office in Riga, Tallinn or Vilnius

Rail Baltica is a once-in-a-lifetime infrastructure megaproject – if you're looking for a meaningful job in an international setting, look no further. This is where you can make an impact to be proud of.

You will be part of integrating the Baltic States into the European rail network and building a new economic corridor to bring long-term benefits to the Baltic region and its people. You will work with a cross-border team of more than 200 of the brightest minds in the industry.

We are looking for a new enthusiastic colleague to join our growing team in the position of **Railway Track Expert**.

Job summary

The primary responsibilities of Railway Track Expert will be to serve in a technical role including planning, analysis, design, design review, work supervision and commissioning of the railway alignment, track superstructure and right-of-way through whole project.

What's in it for you

A job with purpose and impact

Exceptional international project experience

Innovation-driven work

Professional and self-development

Flexible work arrangement

Benefits and Bonus programme

Supportive network of professional colleagues

Salary from 3000 EUR (before taxes)

We will entrust you to

- Lead and supervise design process of railway track superstructure, track layouts and alignment
- Communicate with Consultants regarding RB Rail technical input on railway alignment technical parameters, supervise superstructure design, check and approve the design solutions for railway alignment, track superstructure, track layouts, turnouts and structural clearances
- Contribute in development of Maintenance Manuals and Technical Specification for track construction and take part in their approval processes
- Provide expert inputs to improve the Rail Baltica Design Guidelines and project requirements for railway alignment and track superstructure design

To succeed, you should have

- 5+ years' experience in railway track engineering, including design, supervision and acceptance
- Well-developed communication and leading skills, with ability to effectively interact with both the business partners and internal technical team members
- Outstanding organizational abilities and technical mindset
- Fluent in English with good command of technical English, knowledge of one of Baltic languages would be advantageous although not essential
- Working knowledge of European track design standards and guidelines and related requirements of the Technical Specifications for Interoperability and their implementation status

Application process
