

Executive Search

Chief Technical Officer

RB RAIL AS office in Riga, Latvia

Rail Baltica is a greenfield rail transport infrastructure megaproject with a goal to integrate the Baltic States in the European rail network. It is the largest Baltic-region infrastructure project in the last 100 years with a length of 870 km, and includes five European Union countries – Poland, Lithuania, Latvia, Estonia and indirectly – also Finland.

Rail Baltica will become the basis for a new economic corridor, post-Covid recovery and military mobility for the Baltic region.

We are looking for a **Chief Technical Officer/ Member of the Management Board** to join our ambitious and growing team!

Job summary

Chief Technical Officer/Management Board member will manage all technical aspects of the global Rail Baltica project in cooperation with national beneficiaries, implementing bodies and key external stakeholders. Will be responsible for technical aspects of studies, design and construction of the high-speed railway line. Will manage the technical requirements for the Project and carry out reviews to ensure the construction adheres to the requirements.

Professional and self-development

Flexible work arrangement

Benefits and Bonus programme

Supportive network of professional colleagues

Competitive remuneration

We will entrust you to

- Join the Executive Management Board.
- Plan, develop and manage all technical aspects of the global Rail Baltica project.
- Lead personnel and structure the Technical Division to enable full project implementation. Plan resource requirements considering project phases
- Define and implement System Engineering methodology with the aim to ensure safe integration of the railway systems for operation of the line, considering interoperability, engineering specifications, environmental issues, RAMS, security, risk management, future operability, and long-term sustainability.
- To define and ensure the necessary IT/OT environment and tools for project execution, modelling of railway operations, applying innovative solutions. Prepare information for future asset management.
- Implement and maintain ISO 9001 quality management systems (Rail Baltica global project).
- Establish standardised approach for the railway implementation with all national Beneficiaries, Implementing Bodies, and suppliers throughout all stages of the project.
- To ensure checks and audits on the adherence to the standards set in the Design Guidelines.

To succeed, you should have

- International experience in a Managerial/Leadership role on a multibillion Euro megaproject ideally including cross-border components.
- The ability to cooperate with a variety of stakeholders, forming diplomatic relationships both internally and externally.
- Previous experience of delivering railway infrastructure (preferable High-speed) from Design, Construction through to Operation.
- Master's degree with specialization in Civil Works, Railway Engineering or other relevant technical science. Project Management Professional education / certification would be considered an advantage.
- Develop an strong overview of the project & the deliverables while retaining 'hands-on' responsibility and motivating the team around.
- Outstanding organizational abilities, ability to manage and motivate multicultural, multi-technical and decentralized team, to operate effectively in a diverse community.
- EU Citizenship with rights to work in EU.
