

Vacancy

## Railway Operation Engineer

RB Rail AS office in Riga (Latvia) or Tallinn (Estonia)

Rail Baltica is a once-in-a-lifetime infrastructure megaproject – if you're looking for a meaningful job in an international setting, look no further. This is where you can make an impact to be proud of.

You will be part of integrating the Baltic States into the European rail network and building a new economic corridor to bring long-term benefits to the Baltic region and its people. You will work with a cross-border team of more than 200 of the brightest minds in the industry.

We are looking for a new enthusiastic colleague to join our growing team in the position of **Railway Operation Engineer**.

## Job summary

The primary responsibilities of the Railway Operation Engineer will be to serve in a technical role for all aspects related to train operation, including operation planning, definition of train services concepts, analyse technical designs of railway infrastructure and facilities regarding their compliance with operation objectives, define functionalities of railway operation and maintenance and necessary steps to start operation and maintenance phase of the railway infrastructure.

## What's in it for you

A job with purpose and impact

Exceptional international project experience

Innovation-driven work

Professional and self-development

Flexible work arrangement

Benefits and Bonus programme

Supportive network of professional colleagues

Competitive salary

## We will entrust you to

- Model and supervise the modelling of Rail Baltica train operation on *RailSys*
- Review and update operational and maintenance reference documentation
- Elaborate and/or review and provide comments and recommendations on the operation and maintenance procedures elaborated by 3rd parties
- Analyse design of railway infrastructure and facilities
- Be involved in studies related to train operation and transport offer.

## To succeed, you should have

- Extensive experience in railway operation
- Experience in high speed (>200 km/h) railway engineering projects
- Experience in railway operation simulation software tools (RailSys or equivalent)
- Knowledge of rail operating principles and practices.

## Application process

If you are willing to be a part of the challenging and unique project, and your experience and personality match the position's requirements, please send your CV and motivation letter in English with the subject "RAILWAY OPERATION ENGINEER" to RB Rail AS recruitment partners Linum Consult Ltd: [europe@linumconsult.com](mailto:europe@linumconsult.com) by the deadline date.
