

Vacancy

Senior Project Control Engineer

RB RAIL AS office in Riga (Latvia)

Rail Baltica is a once-in-a-lifetime infrastructure megaproject – if you're looking for meaningful work in an international setting, look no further. This is where you can make an impact to be proud of.

You will lend a hand in integrating the Baltic States into the European rail network and building a new economic corridor to bring long-term benefits to the Baltic region and its people. You will work with a cross-border team of more than 200 brightest minds in the industry.

We are looking for a new enthusiastic colleague to join our growing team in a position of **Senior Project Control Engineer**.

Job summary

The candidate will be a self-starter with a high level of energy and motivation and have proficiency in the use of cost control techniques, databases, spreadsheets, word processing and Cost Management software, and have an aptitude to become familiar with RBR cost control / reporting tools. The candidate must have excellent oral and written communication skills and be capable of communicating ideas and issues across multi-discipline teams. Working knowledge of the cost engineering work processes for Engineering, Procurement and Construction work processes on infrastructure projects is essential as are skills related to identifying, analyzing, and solving problems.

What's in it for you

A job with purpose and impact

Exceptional international project experience

Innovation-driven work

Professional and self-development

Flexible work arrangement

Benefits and Bonus programme

Supportive network of professional colleagues

Salary from 5500 EUR (before taxes)

We will entrust you to

- Assist with the development and implementation of acceptable planning and scheduling techniques and methods
- Create and maintain the project time schedules using professional CPM planning software. Undertake critical path analysis and communicate the status of the project
- Monitor and update accurate schedule progress, analyse data, and create reporting to inform accurately management toward achieving the project within time and budget
- Monitor and control the costs. Identify cost reducing opportunities and corrective actions where necessary
- Prepare and provide schedule progress reports, trending charts or dashboards, and schedule analysis and status on KPIs performance

To succeed, you should have

- A minimum of a Bachelor of Science diploma in Quantity Surveying, Construction or equivalent
- More than 5 years working with cost or schedule control processes in the infrastructure industry
- An advanced level of understanding of Project Controls general technical skills with strong analytical and reporting skills
- An advanced knowledge and competency with CPM scheduling software (Oracle Primavera P6, MS Project or Safran Planner).
- An advanced knowledge of Microsoft Excel
- A good knowledge of engineering, procurement, contracts, construction, and commissioning work processes
