

Vacancy

Technical Interface Expert

RB Rail AS office in Riga, Latvia

Rail Baltica is a once-in-a-lifetime infrastructure megaproject – if you're looking for a meaningful job in an international setting, look no further. This is where you can make an impact to be proud of.

You will be part of integrating the Baltic States into the European rail network and building a new economic corridor to bring long-term benefits to the Baltic region and its people. You will work with a cross-border team of more than 200 of the brightest minds in the industry.

We are looking for a new enthusiastic colleague to join our growing team in the position of **Technical Interface Expert**.

Job summary

The primary responsibility of Technical Interface Expert will be to ensure the correct implementation of the Interface Management Process of Rail Baltica, thus participating in the whole lifecycle of technical interfaces and leading and monitoring all activities and deliverables related with the technical interfaces linked to the Rail Baltica project, from conception up until commissioning phases, either belonging to the railway infrastructure (between elements as civil works, tracks, electrification (ENE) and control, command and signalling (CCS) systems, stations, etc) or to external stakeholders (public and private owners, utility networks, other infrastructure networks, etc).

What's in it for you

A job with purpose and impact

Exceptional international project experience

Innovation-driven work

Professional and self-development

Flexible work arrangement

Benefits and Bonus programme

Supportive network of professional colleagues

Salary from EUR 3500 (before taxes)

We will entrust you to

- Ensure the correct implementation of the Interface Management Process
- Follow-up of the lifecycle of the interface requirements during the implementation of Rail Baltica project
- Develop and maintain technical interface register, matrix and related interfaces documentation
- Lead technical group to issue technical conditions on projects outside the Rail Baltica Global Project (RBGP)
- Coordinate the technical review of Detailed Technical Design according to Technical Division process in place
- Contribute to Programs and Projects Preparation, Implementation, and Finalization activities ensuring identification of right scope of interface requirements in every project, implementation, and compliance status
- Contribute to System Integration to confirm the validation of interface requirements

To succeed, you should have

- Bachelor's degree or equivalent in Electrical (preferable) or Civil Engineering, with Railway or Road Engineering specialisation
- Experience in interface management in transport system, energy, or telecommunication infrastructure projects
- Proficient in the MS Office Suite, experience in system engineering and requirements management is a plus
- Well-developed communication skills, with ability to effectively interact with both the business partners and internal technical team members
- Outstanding organizational abilities and technical mindset

Application process

If you are willing to be a part of the challenging and unique project, and your experience and personality match the position's requirements, please, send your CV and motivation letter in English with the subject "TECHNICAL INTERFACE EXPERT" to RB Rail AS recruitment partners SIA ASTRAL Executive Search: railbaltica@astralexecutive.com by the deadline date.
