1. INTRODUCTION TO RAIL BALTICA

Rail Baltica is a greenfield rail transport infrastructure project aiming to integrate the Baltic states into the European rail network. Spanning five European Union countries – Poland, Lithuania, Latvia, Estonia, and indirectly, Finland – it will connect major cities including Helsinki, Tallinn, Pärnu, Riga, Panevėžys, Kaunas, Vilnius, and Warsaw. Rail Baltica is a part of two European transport network corridors – North Sea-Baltic TEN-T corridor as well as the Baltic Sea - Black Sea - Aegean Sea TEN-T corridor.

With a length of almost 900 km, Rail Baltica is designed for both passenger and freight traffic, featuring a maximum speed of 249 km/h for passengers and 120 km/h for freight. Environmentally friendly, it will be fully electrified, producing less noise and vibration.

To meet growing investment needs and the 2030 deadline, Rail Baltica will be implemented in phases. The first phase, estimated at 15.3 billion EUR, will establish an operational cross-border corridor linking Estonia, Latvia, and Lithuania with Poland. The second phase, dependent on future funding, will complete full integration into Europe's rail network.

Rail Baltica is managed through cooperation between the central coordinator of the project RB Rail AS, national implementing bodies, and the responsible ministries of Estonia, Latvia, and Lithuania. RB Rail AS, a joint venture of the three countries, coordinates the project at the international level, overseeing planning, system integration and assurance, subsystem development, consolidated material procurement and cross-border integration. Each country has its own national implementing body – Rail Baltic Estonia, Eiropas Dzelzceļa līnijas in Latvia, and LTG Infra in Lithuania – responsible for local implementation of the project. The responsible ministries provide regulatory oversight, secure national funding, and ensure alignment with national and EU policies.

The diagram below illustrates the shareholder and project governance structure of the Rail Baltica.

Rail Baltica prioritizes sustainability, safety, and modernity. Utilizing the latest technologies and materials, it adheres to stringent safety standards, including the European Railway Traffic Management System (ERTMS) for train control and safety measures such as two-level crossings and full fencing. Passenger stations will offer convenient access and amenities, while new intermodal freight terminals will facilitate efficient cargo transfer between transport modes. In addition to passenger travel, businesses will be able to use Rail Baltica for freight transport and logistics.

The new railway will make it easier for companies to provide services across the entire region and take advantage of new growth opportunities. Fast and reliable cargo services will ensure better access to the European market and companies in the Baltic states will become more competitive at global level. Railways are significantly and measurably more environmentally friendly than other forms of transport. Rail Baltica will be fully electrified, thereby reducing CO2 emissions to the lowest possible levels.

Rail Baltica will contribute to the security of the Baltic states by establishing railway connectivity with their allies in Europe and improving military logistics in the entire region. By aligning rail gauge and other technical parameters with the European railways, Rail Baltica will be part of European military mobility.

By 2030, it aims to complete the corridor with its emphasis on sustainability, safety, and modernity, Rail Baltica represents a significant step towards a more integrated, efficient, and environmentally friendly transportation network in the Baltic region and beyond.

Additional notes	A. In cases where this document or other documents related to this Procurement do not explain definitions used, the explanation of a particular definition must be interpreted in a manner consistent with the definitions commonly used in Directors and Officers liability insurance policies according to the best market practice in Europe. B. The literal wording of proposed insurance terms and definitions might differ from those included in the Procurement related documents (prepared by the RB Rail AS), however the alternative wording shall not be narrower in scope than the terms of these Regulations or for this Procurement and should be aligned with and reflect the terms of the

Regulations for this Procurement and its annexes (including this Technical Specification).

- A. RB Rail AS informs that during the first half 2025, RB Rail AS received information from a former Member/Chairperson of the Management Board of RB Rail AS who had received a summons from the Corruption Prevention and Combating Bureau ("KNAB"). This individual informed RB Rail AS that: (1) he/she was summoned by KNAB to provide explanations regarding decisions taken in relation to the Rail Baltica project during the period from October 2015 to September 2018; and (2) he/she was requested to provide testimony within the framework of criminal proceedings about which the information can be found here: <https://www.lsm.lv/raksts/zinas/latvija/18.12.2024-sak-kriminalprocesu-par-parkapumiem-rail-baltica-projekta-ieviesana.a580770/>
The insurer that provided the Directors & Officers liability insurance policy at that time was duly notified of this fact.

RB Rail would like to emphasize that no claims have ever been made, and, to the best of RB Rail AS's knowledge, there are no pending claims against any past or present Insured Persons.
